

**BCM<sup>®</sup>**

A soldier in full tactical gear, including a helmet and goggles, is shown from the chest up. He is holding a rifle with a wide-body stock. The rifle has a large, grey, textured stock with a strap. The soldier is wearing a dark red t-shirt and a watch on his left wrist. The background is dark and out of focus.

# BCM<sup>®</sup> MOD 1 STOCK

WIDE-BODY SOPMOD WITH STORAGE

**EXPANDING ON THE SERIES OF BCM DROP-IN REPLACEMENT STOCKS FOR THE M4 CARBINE, THE BCM MOD 1 STOCK FEATURES A SOPMOD STYLE BODY FOR A MORE PRONOUNCED CHEEK WELD, AND A STORAGE CAVITY IN THE TOE OF THE STOCK, ACCESSIBLE THROUGH THE HINGING BUTTPAD.**

The Mod 1 stock also shares many of the same enhancements as the Mod 0 (hard link) and Mod 2 (hard link) variants to include: using the same patented\* internal latch system, a modular VBOST (Vehicle Borne Operations Sling Tab), and multiple ambidextrous sling mounting options (QD swivel interface and a pass through port for webbing). All of these features have been incorporated into a longer overall length component to fit Mil-Spec AR15, AR10, and MK2 RMS intermediate receiver extensions.

# UNDER THE HOOD

**The patented internal latch adjustment system reinvents the stock interface, creating a precise engagement and fit with a Mil-Spec buffer tube.**

**Specifically engineered to dissipate impact stress through the assembly, the precision fit latch is made from heat-treated ordinance grade steel and is flat on all sides to ensure the Stock interface with the receiver extension cannot be obstructed by dirt or debris.**

**Its unique geometry also provides increased torsional strength and eliminates the stress-riser found on conventional rounded pins.**

## VBOST

The VBOST is an interface that provides multiple positions for retention bands when the weapon system is run with the sling "S-folded" against the stock. Typically configured in this manner for vehicle operations or concealed "low vis" movement, the VBOST creates options for the end user that can be vital in critical life saving situations.

## STORAGE

The Mod 1 Stock features a hidden storage bay, sealed by a hinged trap door with a water resistant rubber gasket. Accessed via the back of the stock, the cavity is large enough to store batteries or other small accessories.

ADAPT TO YOUR MISSION

The background of the image features a dark, monochromatic pattern of stars and stripes, reminiscent of the United States flag. The stars are arranged in a grid on the left side, while the stripes are horizontal bands on the right side. The overall color palette is dark, with the stars and stripes appearing in shades of grey and black.

# MADE IN AMERICA

**All BCM components and accessories unite state of the art manufacturing with lightweight and durable materials to ensure components that last a lifetime, performing far beyond performance requirements established nearly six decades ago.**
